01 · THE ASK

Raising $1.5M

to take 16Ahead from working product to repeatable sales.

INSTRUMENT	VALUATION CAP	MINIMUM CHECK	TARGET CLOSE
SAFE	$30M	$25,000	Dec 30, 2026

One request. Sixteen AI apps. A result you approve.

One request, one plan

Ask in plain words. 16Ahead turns the request into a plan of steps across its apps.

Sixteen apps, working as one

The apps hand the work to each other: what Find discovers, Outreach uses, and Docs turns into a proposal.

A complete result, for your yes

The work happens overnight. In the morning the result is ready to approve, and nothing goes out without a yes.

Always the next move

Then it looks at everything in motion and lines up what should happen next.

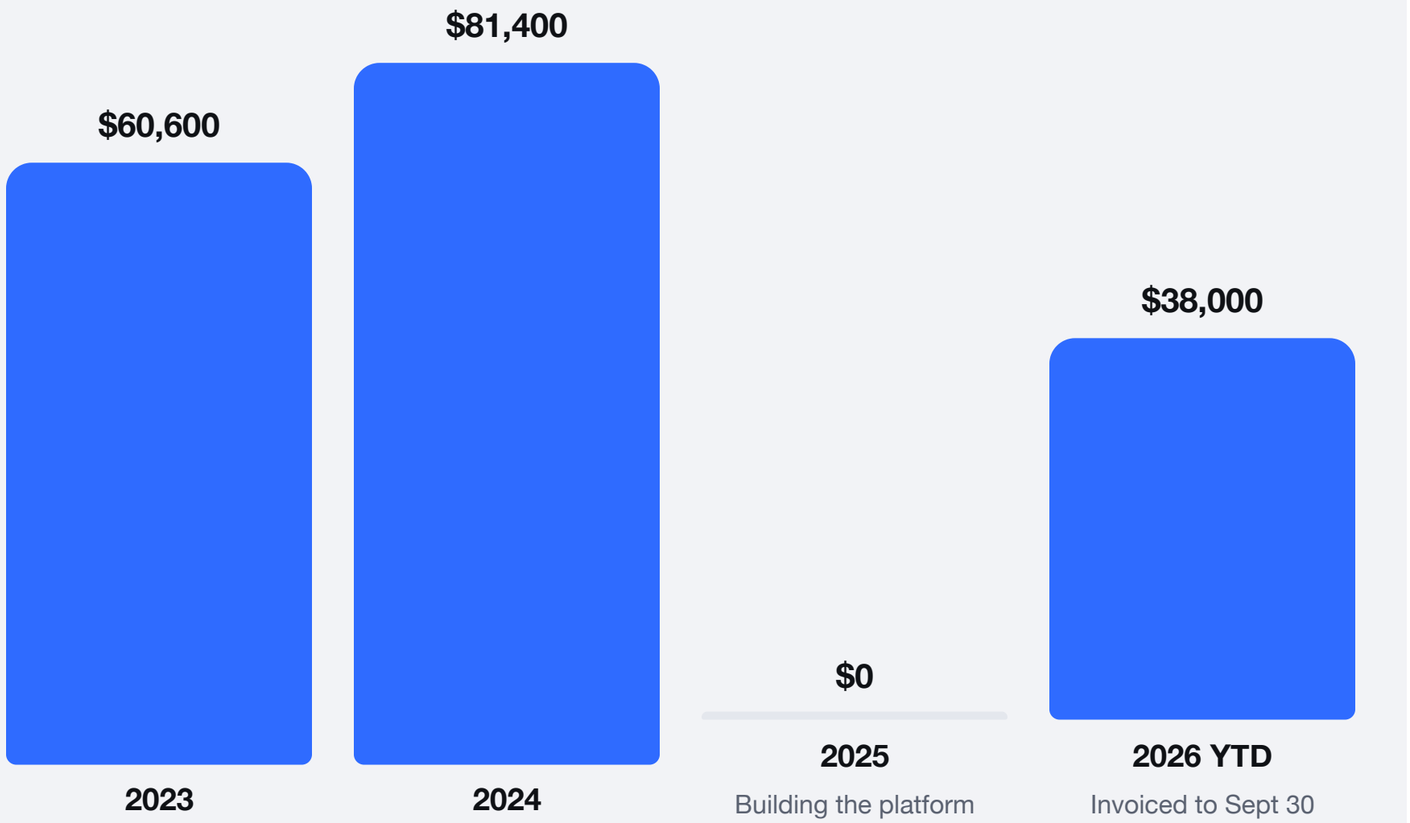

03 · SEE IT WORK

Three requests, three complete results

“Start a candle business called Ember & Oak.”	Store live with products. Image Creator made the photos and logo, Docs wrote the terms, Social scheduled the first posts, SayIt made a brand jingle.
“Get our new product in front of 50 local boutiques.”	Find and Lead Vault found the shops. Email Creator and Image Creator made a pitch and lookbook for each. Outreach sent them; the morning report shows who replied.
“Find out why customers stopped buying.”	Pulse surveyed past customers, Docs wrote a report with the top three reasons, and Marketing Assistant drafted a win-back campaign for one-tap approval.

The videos of all three are on 16ahead.com.

A working product, paid for without loans

$0

company debt

$440,100

contributed by the founders and 12 supporters, with no repayment terms

3

customers invoiced in 2026, plus a $99/month suite subscriber

2023–24: gross receipts, filed Form 1065. 2026: invoiced through September 30, internal records, unaudited.

05 · CUSTOMER HISTORY

Built to order, tested by a hard year

2023

Customers paid us to build specific tools. We folded each one into a single codebase instead of handing it off.

2024

$81,400 in gross receipts, about $40,000 of it a Washington State consulting contract.

2025

Most of our supplier-diversity customers closed when federal programs were rolled back. The survivors kept the engine running, so we paused client work and rebuilt it to take any request.

2026

First product sales: $38,000 invoiced to three customers.

Customers who'll speak with you: a wealth manager for professional athletes, a flooring contractor, a supplier-diversity consultancy, a fireplace repair company and a commercial construction firm. Names on request.

06 · PROOF

The engine already does a job customers pay for

+25%

revenue with no new hires

Same company

+12%

more bids won

Commercial construction firm

+40%

vendor engagement from automated follow-ups

Supplier-diversity consultancy

Results on the earlier version. Each of these customers has agreed to speak with investors.

07 · PRICING AND BUSINESS MODEL

Three plans that grow with the customer

SINGLE APP

$4.99–$19.99 a month

Anyone who wants one job done, such as outreach, social posts or documents. The low-cost way in.

16AHEAD SUITE

$99 a month

Founders, owners and teams who want the work carried across every app. Where our customers are today.

ENTERPRISE

$5,000 a month

A dedicated environment across departments, with roles, reports and its own data flows. Where we grow next.

Add-ons such as extra contacts at $5 per 1,000 a month. Affiliates earn 15% of Enterprise payments.

A $12.6B market, counted from the bottom up

$12.6B

a year: every eligible US employer firm at our list prices

1%

our target share, about $126M a year in revenue

6.4M

US firms with 1–999 employees (Census Bureau, 2022)

Suite: 6,281,253 firms with 1–99 employees × $1,188 a year = $7.5B. Enterprise: 103,741 firms with 100–999 employees × $50,000 = $5.2B. Census Bureau SUSB 2022.

Sixteen apps on one engine

Live today

General Assistant, Marketing Assistant, Find, Network, Moves, Outreach, Pulse, Docs, Social, Lead Vault, Email Creator, Email Signature, Image Creator and Store on the web. Find, Network, Outreach, Pulse and Docs on iOS.

Next

Move every current customer onto 16Ahead. iOS apps for Marketing Assistant and Moves (in development); SayIt and Social to follow.

Why it compounds

Every app runs on the same engine, so a new app doesn't need a new backend, every improvement reaches every app, and every request can use all sixteen.

10 · COMPETITION

Every other AI tool does one job. 16Ahead runs sixteen as one.

Chat assistants	ChatGPT and others answer and draft. A person still carries the work into every other tool.
Automation tools	Zapier, Make: connect apps, but someone has to design and maintain every workflow.
AI sales reps	11x, Artisan, Regie.ai, AiSDR: one job, cold outreach for sales teams, from about $250 to $3,750+ a month.
16Ahead	You ask in plain words. It plans the work, runs it across sixteen apps and brings back a complete result to approve. $99 a month.

AI sales rep pricing: 11x from about $3,750 a month (annual), Artisan around $2,000, Regie.ai $180–$499 per user, AiSDR about $250–$900. Vendor pages and reviews, November 2026.

The next 90 days, and what the next round needs to see

Next 90 days

Move every current customer onto 16Ahead. Measure each request from ask to approved result: results approved, time saved, replies and meetings. Convert free and lapsed accounts back to paid.

Toward the next round

Recurring revenue on a path to $1M a year, a repeatable way to win customers beyond founder sales, and requests that use more of the sixteen apps over time.

Simple ownership, no debt

OWNER	ROLE	OWNERSHIP
Tyrone Showers	Co-founder	**49.39%**
Vikki Owens	Co-founder	**49.39%**
12 supporters	Converted at an $18M valuation	**1.23%**

Taliferro Tech, LLC, Seattle. No loans, lines of credit or leases. Supporter conversion agreements are being signed. Independent indicative valuation: $18M–$30M (September 2026).

What could slow us down

Revenue is early

2026 revenue is $38,000 invoiced to three customers, and 74% of it comes from two of them.

Sales are founder-led

We haven't yet shown a repeatable way to win customers without the founders selling.

A new category

Customers understand a single app faster than sixteen working as one, so part of the job is education.

Focus

Many apps compete for a small team's time. The raise is meant to fund that focus.

Key people

The platform depends on its lead developer. A written succession plan names a successor and is being completed.
