INVESTOR OVERVIEW · NOVEMBER 2026

16Ahead

Tell it what you want done. Sixteen AI apps get it done.

Taliferro Tech, LLC · Seattle, WA

THE PROBLEM

Businesses have more tools than ever. The work still waits on people.

Work falls between tools

Every app does one piece. A person still carries the work from one to the next, and that's where it stalls.

One result takes many hands

A launch, a proposal or a real answer needs research, writing, design and sending: several people or several tools.

Nobody knows what's next

The next move lives in someone's head. When they're busy, it waits.

WHAT 16AHEAD DOES

One request. Sixteen AI apps. A result you approve.

One request, one plan

Ask in plain words. 16Ahead turns the request into a plan of steps across its apps.

Sixteen apps, working as one

The apps hand the work to each other: what Find discovers, Outreach uses, and Docs turns into a proposal.

A complete result, for your yes

The work happens overnight. In the morning the result is ready to approve, and nothing goes out without a yes.

Always the next move

Then it looks at everything in motion and lines up what should happen next.

SEE IT WORK

Three requests, three complete results

“Start a candle business called Ember & Oak.”	Store live with products. Image Creator made the photos and logo, Docs wrote the terms, Social scheduled the first posts, SayIt made a brand jingle.
“Get our new product in front of 50 local boutiques.”	Find and Lead Vault found the shops. Email Creator and Image Creator made a pitch and lookbook for each. Outreach sent them; the morning report shows who replied.
“Find out why customers stopped buying.”	Pulse surveyed past customers, Docs wrote a report with the top three reasons, and Marketing Assistant drafted a win-back campaign for one-tap approval.

Each one is a single request in plain words. Watch them run on 16ahead.com.

PROOF

The engine already does a job customers pay for

+25%

revenue with no new hires

Seattle fireplace repair company

–70%

time spent on admin

Same company

+12%

more bids won

Commercial construction firm

+40%

vendor engagement from automated follow-ups

Supplier-diversity consultancy

Customers on the earlier version use it for prospecting and follow-ups: the same engine that now runs any request across sixteen apps. Every app exists because a paying customer asked for it.

WHAT WE LEARNED THE HARD WAY

A policy change nearly ended us. It showed us the engine is the product.

Our early customers were concentrated in supplier-diversity consulting. When federal programs were rolled back, most of them closed. The ones who stayed kept the engine running for them every day, so we rebuilt it to take any request, not any one industry's.

MARKET

A $12.6B market, counted from the bottom up

$12.6B

a year: every eligible US employer firm at our list prices

1%

our target share, about $126M a year in revenue

6.4M

US firms with 1–999 employees (Census Bureau, 2022)

US employer firms from the Census Bureau's Statistics of U.S. Businesses (2022) multiplied by our list prices. Not counted: businesses with no employees, firms with 1,000+ employees, and everything outside the US.

COMPETITION

Every other AI tool does one job. 16Ahead runs sixteen as one.

Chat assistants	ChatGPT and others answer and draft. A person still carries the work into every other tool.
Automation tools	Zapier, Make: connect apps, but someone has to design and maintain every workflow.
AI sales reps	11x, Artisan, Regie.ai, AiSDR: one job, cold outreach for sales teams, from about $250 to $3,750+ a month.
16Ahead	You ask in plain words. It plans the work, runs it across sixteen apps and brings back a complete result to approve. $99 a month.

BUSINESS MODEL

Subscriptions in three plans that grow with the customer

SINGLE APP

$4.99–$19.99 a month

Anyone who wants one job done, such as outreach, social posts or documents. The low-cost way in.

16AHEAD SUITE

$99 a month

Founders, owners and teams who want the work carried across every app. Where our customers are today.

ENTERPRISE

$5,000 a month

A dedicated environment across departments, with roles, reports and its own data flows. Where we grow next.

Add-ons such as extra contacts. Affiliates earn 15% of Enterprise payments, a referral channel for Enterprise.

TEAM

Operators who lived the problem

Tyrone Showers

Co-founder and Chairman

Decades leading data and systems work for AT&T, Accenture, Johnson & Johnson and public agencies.

Vikki Owens

Co-founder and Strategic Advisor

Certified Scrum Master and PMP who has delivered government and enterprise projects.

Ted Freeman

President

Booker Showers

Chief Technical Advisor
